ACTURA HEALTH

CAPABILITY STATEMENT

Where Accountability Meets Action in Correctional Healthcare

Actura Health is an independent correctional healthcare consulting firm. We partner with sheriff's offices, counties, and correctional health systems to strengthen quality of care, close compliance gaps, reduce risk, and prepare for accreditation. We work alongside custody, medical, and behavioral health teams toward one shared mission of safe, defensible care.

CORE COMPETENCIES

Quality Oversight (QA + CQI)
Independent, ongoing oversight of contracted health services that pairs QA (record review, on-site observation, standards-based scoring) with CQI (PDSA cycles, root cause analysis, corrective action tracking).

Risk Management & Compliance Review
Reviews against contract terms, policy, NCCHC standards, state regulations, and consent decree obligations, including mortality and critical-incident review, grievance trend analysis, and corrective action planning.

Staffing & Operational Analysis
Staffing studies and workflow reviews of medical and behavioral health services: filled vs. budgeted positions, scheduled vs. actual hours, overtime/agency/locum use, and throughput-based analysis.

Data Analytics & Custom Reporting
Custom analytics built on data facilities already collect, such as RFID movement data, throughput trends, and staffing dashboards, with defensible documentation for consent decree obligations.

RFP & Procurement Support
RFP development, performance measures, vendor budget and staffing cost analysis, and ongoing vendor performance review.

Behavioral Health Quality Oversight
The same QA + CQI model for mental health and substance use care, including suicide prevention and MOUD/OTP continuity. Led by a board-certified PMHNP with psychiatrist (MD) support.

NCCHC Accreditation Readiness
Gap assessments, mock surveys, and standard-by-standard preparation led by CCHP-certified advisors and an active NCCHC surveyor, so readiness becomes the daily norm.

Care Coordination & Case Management
Review and design of intake, transfer, and release workflows, discharge planning, off-site care coordination, and reentry planning, including Medicaid enrollment, community care linkage, and medication bridge supply.

EHR / EMR Advisory
Clinical and operational guidance for correctional EHR selection, implementation, workflow design, and go-live readiness, including clinical–custody data exchange and data migration integrity.

Interim & Fractional Leadership
Experienced executives available on an interim or fractional basis for healthcare operations, clinical programs, and quality, risk, and compliance.

REPRESENTATIVE ENGAGEMENT

Large County Sheriff's Office · Jail Health Services
Multi-year contract | Independent quality oversight (QA + CQI) | Current

Independent quality oversight for one of the largest county jail systems in the country, alongside the sheriff's office compliance and medical units, the county health agency, and the contracted provider. Includes monthly record review and on-site observation, corrective action tracking through verified resolution, mortality review and suicide prevention committee participation, staffing review, medical vendor RFP development, reporting to agency leadership and the county board, and clinical and operational advisory support for the county's EHR transition and accreditation effort.

OUR TEAM

Clinical
- Board-certified MD: internal medicine, clinical informatics
- Psychiatry (MD) and psychiatric-mental health nurse practitioner (PMHNP-BC)
- Correctional and rehabilitation nursing (RN, CRRN)
- Access to other medical specialties

Leadership & Operations
- Former hospital C-suite executives
- State correctional health system medical leadership
- Multi-hospital quality, risk, and compliance leadership
- Health plan case management, utilization management, and state regulatory review

Standards & Credentials
- CCHP-certified advisors
- Active NCCHC surveyor
- Healthcare law (MLS)
- MD, DHA, MBA
  MHA, MSHA, MSN
- Lean Six Sigma

DIFFERENTIATORS

Independent by design
We review care; we don't deliver it. No direct-service line means no conflict in what we report.

Partners, not inspectors
We sit at the same table as custody, medical, and behavioral health teams. Our approach is non-punitive, so staff participate in accountability instead of having it imposed.

Former operators
Our team has run hospitals and led correctional medical programs. Recommendations are built with the people who work the shift.

Standards fluency
We apply standards the way surveyors evaluate them, so readiness holds on survey day.

Closed-loop follow-through
QA identifies, CQI acts, QA verifies. Every corrective action has an owner, a date, and a re-review before it closes.

WHO WE SERVE

- Sheriff's offices and county jails
- County health and behavioral health agencies
- State and local correctional health systems
- Agencies procuring or overseeing contracted medical services
- Facilities under consent decree or court monitoring
- County boards, commissions, and oversight bodies

COMPANY

LEGAL NAME
Actura Health LLC

FOCUS
Correctional healthcare quality oversight, risk and compliance, and accreditation consulting
